

I personally do not listen to XM on a daily basis. So, I DO listen to local radio to get my traffic. I get my weather on line. What I don't get is local sports broadcasting from my home town in Charlotte. With satellite radio I do. I personally am sick of the mundane music played on the radio on every station. If petition 04-160 were to pass, it would supress competition. Look what has happened to the cable industry. Do you think we would have had digital cable if not for the competition of satellite?
